RECEIVED MAY 10 2016

**Re: Carriage of WYCI, Saranac Lake, NY  
Cable Community: See attached  
DMA: Burlington/Plattsburgh**

Dear Mike

Full power television station WYCI, FCC Facility ID 77515, Saranac Lake, New York, is located in the Burlington-Plattsburgh Designated Market Area (DMA) and is entitled to mandatory carriage on all cable television systems serving subscribers in that DMA. The right to carriage arises under Section 614(b)(1)(B) of the Communications act of 1934, as amended, 47 U.S.C. § 534(b)(1)(B), and Section 76.56(b)(2) of the Rules and Regulations of the Federal Communications Commission (FCC). WYCI did not make an election between mandatory carriage and retransmission consent by October 1, 2014. Therefore, it is a must-carry station by default under Section 76.64(f)(3) of the FCC's Rules.

Cross Hill Communications, LLC, acquired the license for WYCI on February 29, 2016, and is now the operator of the station. We believe that your cable system is not currently carrying WYCI. If that is the case, failure to carry WYCI is a violation of the applicable statute and FCC rules.

WYCI has the right to be carried on the cable channel which corresponds to its over-the-air virtual channel number, pursuant to Section 76.57(f) of the FCC's Rules. We request carriage on cable channel 40, which is both the station's over-the-air and its virtual channel. While we assert our right to carriage on Channel 40, we are willing to discuss carriage on a different channel if it is mutually agreeable. In any event, the channel on which the station is carried must be included in your system's basic tier, distributed to all subscribers.

If you are unable to receive a good quality signal from WYCI over-the-air, we are entitled, and we commit, to deliver a good quality signal to your headend by alternate means.

Please consider this letter to be a formal request for carriage pursuant to Section 76.61(a) of the FCC's Rules, which begins the 30-day time period for you to respond pursuant to Section 76.61(b). We look forward to cooperating with you to have WYCI included in your system's broadcast channel lineup.

Very truly yours,  
Daniel Carbonara, Office Supervisor

Re: WYCI-TV, Saranac Lake, New York – Request for Mandatory Carriage on Comcast's  
Burlington-Plattsburgh DMA Cable Systems

Dear Mr. Carbonara:

We are in receipt of your May 6, 2016 request for mandatory carriage of WYCI (TV) Saranac Lake, New York ("WYCI") on Comcast cable systems serving communities in the Burlington-Plattsburgh Designated Market Area (the "DMA").

As you know, federal law requires a television station that has requested mandatory carriage with respect to a cable system to deliver a "good quality signal" to the principal headend of such cable system. In regard to Comcast's DMA cable systems, as indicated on the attached signal measurement forms, WYCI does not deliver a good quality over-the-air signal to any of Comcast's five (5) principal headend facilities in the market. Accordingly, Comcast does not believe that WYCI is entitled to mandatory carriage on any of these cable systems at this time.

To the extent you want to perform your own signal measurements, or desire to deliver a good quality signal via alternative means to any of the principal headend facilities serving the communities in question, please contact Brendan Clifford at 203-627-7601 or "[brendan\\_clifford@comcast.com](mailto:brendan_clifford@comcast.com)" to coordinate. However, please be advised that notwithstanding WYCI's signal strength deficiencies, in reviewing WYCI's signal contour/market coverage, combined with WYCI's significant geographic distance from the relevant cable communities, the circumstances appear to meet the criteria established by federal law to modify WYCI's must-carry market to make it congruous with market realities. Accordingly, Comcast reserves any and all of its rights, including but not limited to the right to seek a market modification at the Federal Communications Commission in order to exclude these cable communities from WYCI's must-carry market.

Let me know if you have any questions.

Sincerely,

A handwritten signature in dark ink, appearing to read "Michael Nissenblatt", written over a horizontal line.

Michael Nissenblatt

cc: Beth Selby, Trevor Arp-Comcast Cable, Northeast Division

### Must-Carry Signal Strength and Quality Tests

According to the FCC, signal strength surveys should, at a minimum, include the following:

- 1) specific make and model numbers of the equipment used, as well as its age and most recent date(s) of calibration;
- 2) description(s) of the characteristics of the equipment used, such as antenna ranges and radiation patterns; 3) height of the antenna above ground level and whether the antenna was properly oriented; and 4) weather conditions and time of day when the tests were made."

Generally, the signal being tested should be treated similarly to other currently-received signals in the same band (same antenna height, etc.). The initial point of measurement should be at the input to the first piece of active processing equipment (*before preamp*) relevant to the signal at issue. To convert dBmV to dBm, subtract 48.75 dB from the dBmV value.

**For a digital station:** a good quality digital television signal at a cable system's principal headend is -61 dBm (-12.25 dBmV). Consistent with analog signal testing procedures, if the initial test results are less than -67 dBm (-18.25 dBmV), at least four readings must be taken over a two-hour period. Where the initial readings are between -67 dBm (-18.25 dBmV) and -61 dBm (-12.25 dBmV), inclusive, at least six readings should be taken over a 24-hour period with measurements not more than four hours apart.

### SINGLE ANTENNAS, SERIES QCA

For installations that require a moderately narrow beamwidth antenna, one of the Series QCA single antennas will provide superior reception through its excellent front-to-back ratio and sidelobe suppression. The wide bandwidth of this antenna permits all VHF channels to be covered by only three antennas.

Mounting hardware is available to permit no-drilling, single-point mounting on round or angle tower sections or on wooden poles. No bracing or other supports are required.

### Get Your Local Channels From DIRECTV

More than 99% of the nation's TV households can enjoy local channels from DIRECTV today, including stations like ABC, CBS, FOX and the CW. There are even more markets coming soon! For select markets, DIRECTV even offers local channels in high-definition.\*

No matter what package you choose to order, local channels are available in any of the packages. Just use the ZIP code/local channel finder, and we'll help you pinpoint the metropolitan area that broadcasts your local channels.

Local channels available in: Burlington VT-Plattsburgh NY (Look up another)

\*Receipt of local channels in these markets requires a DIRECTV Multi-Satellite System.

\*\*Receipt of local channels in these markets requires the use of a second 18-inch DIRECTV Dish.

\*\*\*Receipt of local channels in these markets requires a 1.2 meter DIRECTV dish.

<sup>†</sup>ZIP code confirmation required.

### Is your area not on this list?

Many customers in this situation can still access local channels via an off-air antenna. If you are within distance of a tower and can capture the signal you'll still get your locals. Simply switch from DIRECTV to antenna using buttons on your remote. Use our antenna locator to find the right antenna for you.

You can also increase your television reception by replacing the cable connecting the antenna to your television. Adding additional equipment, like external amplifiers or ghost cancellers, can work well too.

A number of DIRECTV<sup>®</sup> customers may also be eligible for non-local network feeds. Eligibility is governed by federal law<sup>†</sup>. The following factors may determine your eligibility:

- Location relative to a metropolitan area.
- Ability to receive television signals of any type.
- Distance from television broadcasting towers.

DIRECTV now offers local channels in HD in select markets! See if [local channels in HD](#) are available from DIRECTV in your area. If DIRECTV offers locals in HD in your market, you will need a H20 model DIRECTV HD Receiver that is MPEG - 4 capable and 5 LNB satellite dish that is ka/ku compatible.

PLEASE NOTE: Eligibility for local channels based on the service address. Not all networks available in all markets.

For Los Angeles residents, five LNB Dish and H20 or HR20 model DIRECTV HD Receiver are needed to receive KTLA. Current customers call 800-531-5000 to upgrade.

\*To access DIRECTV HD programming, a triple LNB Dish is required. In some markets, a five-LNB Dish and H20 model receiver are needed to receive HD Local networks delivered by DIRECTV.

Programming, pricing, terms and conditions are subject to change. Hardware and programming available separately.
